Salesforce Sales Cloud - How do I attach a file to an opportunity in Salesforce using the SAP Cloud Platform Open Connectors API?

Last Modified on 05/06/2019 2:34 pm EDT

To do this, use the `POST /{objectName}/{objectId}/attachments` API where the `objectName` would be Opportunity and the `objectID` would be the ID of the opportunity you would like to attach it to. To retrieve the attachments related to an opportunity you can use the `GET /{objectName}/{objectId}/attachments` API.
