

Quickbooks Online - How Can I Query any QBO resource using OR or JOIN operators

Last Modified on 03/26/2020 3:23 am EDT

Quickbooks Online has the following OCNQL limitations:

- **OR** operator is not supported in where clauses;
 - **GROUP BY** and **JOIN** operator are not supported;
 - Wildcard character support with **LIKE** clauses is limited to “%” (wildcard that substitutes for 0 or more characters);
 - The response set returns all properties for each object (that is, projections are not supported).
-
