Acuity Scheduling API Provider Setup

To authenticate an Acuity Scheduling connector instance you must register an OAuth2 Account. When you authenticate, use the **Client ID**, **Client Secret**, and **Redirect URI** as the **API Key** (`oauth.api.key`), **API Secret** (`oauth.api.secret`), and **Callback URL** (`oauth.callback.url`).

You can view the **Client ID**, **Client Secret**, and **Redirect URI** only immediately after you register an OAuth2 Account.

Register

See the latest setup instructions in the Acuity Scheduling documentation.

1. Navigate to the Acuity Scheduling OAuth2 Account Registration page.
2. Complete the required information, and then click **Register**.
3. Record the **Client ID**, **Client Secret**, and **Redirect URI** for your app.
