

# Expensify API Provider Setup

Last Modified on 04/15/2019 2:27 pm EDT

Follow these steps to retrieve your Expensify Partner User ID and Secret. Find more information about the Expensify API by visiting the [Expensify Documentation](#).

## Excerpt from Expensify Getting Started Guide

Expensify / Getting start

Follow the simple steps below to get up and running with the Expensify Integration Server.

- Create an Expensify account

If you don't already have one, create an Expensify account for free at <https://www.expensify.com>

- Generate Integration Server credentials

In order to interact with our API, you will need credentials. To generate them, go to <https://www.expensify.com/tools/integrations/>. You will be provided with a partnerUserID and partnerUserSecret pair.

- Make your first request

Check out our [code samples](#) to learn how to make your first API requests.

- Explore specific documentations

Documentation is available on the [index](#) page.
