

Bullhorn CRM API Provider Setup

Last Modified on 12/30/2019 1:32 pm EST

Bullhorn requests you contact them via support to set up a REST OAuth App.

Contact [Bullhorn Support](#).

Bullhorn will send you credentials, as well as an API key and secret (`client_id` and `client_secret`). They also require some additional information regarding your app.

Bullhorn follows standard OAuth2 from there.

Find out more information about the [Bullhorn API](#) and [Support Forum](#).
