E-conomic API Provider Setup

On this page

To authenticate a E-conomic connector instance you must register an app with E-conomic. When you authenticate, use the **App Public Token** and **App Secret Token** as the (`oauth.api.key`), AND (`oauth.api.secret`).

If you've already set up an app and just need to know how to find your **App Secret Token** and **App Public Token**, see Locate Credentials for Authentication. If you need to register an app, see Create an Application.

See the latest setup instructions in the E-conomic documentation.

Locate Credentials for Authentication

If you already created an application, follow the steps below to locate the **App Secret Token** and **App Public Token**. If you have not created an app, see Create an Application.

To find your OAuth 2.0 credentials:

1. Log in to your account at E-conomic.

2. Click the Developer tab.
3. Record the **App Secret Token** and **App Public Token**.

Create an Application

If you have not created an application, you need one to authenticate with E-conomic.

To create an application:

1. Log in to your account at E-conomic.

2. Click the Developer tab.
3. Click **New app**.
4. Enter a name and select the roles that you want to grant to users authenticating with E-conomic.
5. Click **Save**.
6. Record the **App Secret Token** and **App Public Token**.
