

# Hubspot Marketing Bulk

Last Modified on 12/30/2019 7:44 pm EST

Bulk provides an option to upload a large number of resources, such as contacts, to a service provider all at once. You can use bulk to download a csv or json file from a large number of records or upload a csv or json file to add multiple records. See [Using Bulk](#) for more information on managing bulk.

**Note:** SAP Cloud Platform Open Connectors leverages the native provider bulk endpoints whenever available. When there is no bulk available from the provider, SAP Cloud Platform Open Connectors provides a bulk service for uploading and downloading data from the endpoint. See [Bulk Details](#) for the type of bulk used.

## Bulk Details

Bulk Information	Details
Bulk Type	Native. Rate limits come into play when using the SAP Cloud Platform Open Connectors bulk service, so review the limitations in the <a href="#">service provider's documentation</a> .
Upsert Support	Yes
Field Selection Support	Yes. You can specify fields within a resource. For example, <pre>select name,id from contacts</pre> .
Order By Support	No

## Hash Verification

If you configured the **Callback Notification Signature Key** ( `event.notification.signature.key` ) when you authenticated a connector instance, the bulk APIs will use the signature key to provide hash verification in the header of bulk jobs. For more information, see [Hash Verification](#).
