

Retrieving Custom Fields

Last Modified on 11/09/2018 5:31 pm EST

Use `GET /custom-fields` to retrieve a list of all custom fields.

The response for `GET /custom-fields` looks like this. Note the `internalId` at the top:

```
[
  {
    "internalId": "3793",
    "scriptId": "custentity_wc_picture",
    "name": "WC Picture",
    "subtab": {
      "internalId": "265",
      "name": "Asset Info"
    },
    "type": {
      "value": "entityCustomField"
    },
    "fieldType": "_image"
  },
  {
    "internalId": "3794",
    "scriptId": "custentity_wc_related_asset",
    "name": "Related Asset",
    "subtab": {
      "internalId": "265",
      "name": "Asset Info"
    },
    "type": {
      "value": "entityCustomField"
    },
    "fieldType": "_listRecord"
  }
]
```
