

Retrieve List Items

Last Modified on 11/09/2018 5:32 pm EST

You can access the `internalId` of list items with `GET /lookups/{fieldname}`, replacing `{fieldname}` with the name of a picklist.

The response for `GET /lookups/currency` looks like this:

```
[
  {
    "internalId": "1",
    "name": "USA"
  },
  {
    "internalId": "2",
    "name": "British pound"
  },
  {
    "internalId": "3",
    "name": "Canadian dollar"
  },
  {
    "internalId": "4",
    "name": "Euro"
  }
]
```
