

# Plaid API Provider Setup

Last Modified on 12/30/2019 9:21 pm EST

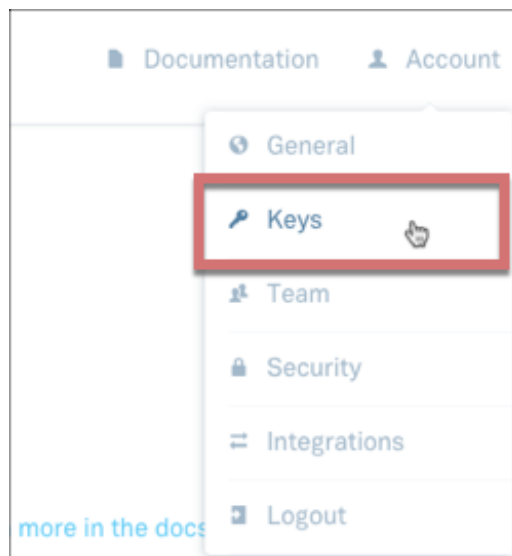

To authenticate a Plaid connector instance must provide information about your Plaid account and the user's bank account:

- Plaid information required: The `public_key` , `secret` , `client_id` , and [API environment](#) (sandbox, production, or development)
- User's bank information required: Bank name (Institution) and bank credentials

See the latest setup instructions in the [Plaid documentation](#).

To find the required Plaid information:

1. Log in to your account at [Plaid](#).

2. Click **Account**, and then select **Keys**.
3. Record the `client_id`, `public_key`, and `secret`.
