

# ServiceNow API Provider Setup

Last Modified on 01/02/2020 11:48 am EST

To authenticate a ServiceNow connector instance, you need have an account with ServiceNow and know your subdomain. The subdomain is the part of your URL that is specific to your organization, for example in `https://domain12345.service-now.com/` , `domain12345` is the subdomain.
