

Slack API Provider Setup

Last Modified on 11/02/2021 8:33 am EDT

Follow these instructions to create a new Slack Connected App.

NOTE: these are the minimum number of steps to create a connected app needed to create an instance. Visit the [Slack API Documentation](#) for more detailed information regarding their API.

Additionally, if your Slack app includes a bot user, upon approval the JSON response will contain an additional node containing an access token to be specifically used for your bot user, within the context of the approving workspace. For more information, refer to [Bot user access tokens](#).

1. Log in to your Slack profile <https://api.slack.com/apps>
2. Create an App

Documentation Tutorials Your Apps

Getting started

- Build an App
- Build a Custom Integration

Slack apps

- Overview
- Slack Button
- Sign in with Slack
- Slack App Checklist
- App Directory
- Managing your apps
- App Developer Policies

Your Apps

[Create New App](#)

ⓘ If your app is (or will be) listed in the Slack App Directory, please review our new [Slack App Directory Agreement](#). These terms are in addition to the existing Developer Policy, API TOS, and Brand Guidelines.

By keeping your app in the App Directory or review process, you're confirming your agreement to the Slack App Directory Agreement and to providing additional information for security review, if requested. If you don't agree with this Agreement, please send an email to feedback@slack.com, and we'll remove your app from the App Directory or the review process.

[I Agree](#)

🔍 Filter apps by name or team

Create an App ✕

App Name

Don't worry; you'll be able to change this later.

Development Slack Team

Your app belongs to this team—leaving this team will remove your ability to manage this app. Unfortunately, this can't be changed later.

I plan to submit this app to the Slack App Directory.
We'll help you get your app ready for submission. If you're not sure, you can decide to submit later.

By creating a Web API Application, you agree to the [Slack API Terms of Service](#).

3. Copy the Client ID and Secret

My Cool App

Basic Information

- Collaborators
- OAuth & Permissions
- Bot Users
- Interactive Messages
- Slash Commands
- Event Subscriptions
- Submit to App Directory

✓ **Your app was created!**
You can now manage OAuth and permissions, bot users, and other features for your app using these pages. Need help? [Documentation](#) and [support](#) are available.

Basic Information

App Credentials

These credentials allow your app to access the Slack API. They are secret. Please don't share your app credentials with anyone, include them in public code repositories, or store them in insecure ways.

Client ID

Client Secret

You'll need to send this secret along with your client ID when making request to our API.

4. Under OAuth & Permissions > input the OAuth Redirect URL and Save

My Cool App

A redirect URL is missing. Please [add at least one](#) to enable OAuth.

OAuth & Permissions

OAuth Settings

You must specify at least one redirect URL for OAuth to work. If you pass a URL in an OAuth request, it must (at least partially) match one of the URLs you enter here. [Learn more](#)

Redirect URL(s)

`https://www.mycoolapp.com/auth`

You must specify at least one URL for authentication to work. If you pass a URL in an OAuth request, it must (partially) match one of the URLs you enter here. [Learn more](#)

Save Changes

SAP Open Connectors recommends visiting the Slack API Documentation and reviewing the information posted regarding the [OAuth Scope and Permissions](#).
