Facebook API Provider Setup

Last Modified on 02/24/2021 8:43 am EST

To set up the Facebook endpoint, you need to have a developer account and create or already have an app.

Note: Facebook provides the most up-to-date and detailed setup instructions at https://developers.facebook.com/docs/apps/register.

To create an app:

- 1. Log in to your Facebook developer account at https://developers.facebook.com/.
- 2. Create a new Facebook app.

Note: The Add App button is located in several places, but an easy way to get to it is from your menu at the top of any Facebook for developers page:

🕸 My Lead Ads App
 CE Test CE Test for Leads
Add a New App
Requests Developer Settings Company Settings Log Out of Facebook

- 3. Complete the Create a New App ID form.
- 4. Click Create App ID.
- 5. Set up the app's platform as a website: Go to Basic Settings, click +Add Platform, and then click Website.

🍇 Last CE Test 🔹	APP ID:						
Dashboard							
Settings		App ID	App ID		App Secret		
Basic Advanced		1853885754858914		•••	•••••	Show	
Roles		Select Platform					
Alerts			3				
App Review		f		é	.		
PRODUCTS		Facebook Canvas	Website	iOS	Android		
Marketing API						and App Details	
+ Add Product				\bigotimes			
		Windows App	Page Tab	Xbox	PlayStation		
					Cancel	2	
			+ Add Platform				

6. For OAuth authentication, add the Facebook Login product: click + Add Product, find Facebook Login at the top, and then click Get Started.

🔯 Last CE Test 🔻	APP ID: ~* View Analytics					
Dashboard Settings		Product Setup				
Roles Alerts App Review	. ▲ ● ● ● ● ● ● ● ● ● ● ● ● ● ● ● ● ● ●	Facebook Login The world's number one social login product.	Get Started			
PRODUCTS Marketing API + Add Product		Audience Network Monetize your mobile app or website with native ads from 3 million Facebook advertisers.	Get Started			
		Analytics for Apps Understand how people engage with your business across apps, devices, platforms and websites.	Get Started			
		Account Kit Seamless account creation. No more passwords.	Get Started			

- 7. In Valid OAuth redirect URIs, enter your <code>oauth.callback.url</code>.
- 8. Click Save Changes.

.

Once you are ready to release to production, you will need to submit your app for testing. You can read more about the process at: https://developers.facebook.com/docs/app-review/submission-guide
