Twitter API Provider Setup

Before you can authenticate an instance of the Twitter connector, you must first complete the following:

- Register for a Twitter developer account (see Twitter's developer documentation to learn more)
- Create a Twitter app

Creating a Twitter Application

Follow these steps to register a Twitter application:

1. Via a web browser, go to https://developer.twitter.com/en/apps and sign into your developer account.
2. Click the **Create an app** button.

3. On the Create an app page, enter the relevant information for your application and then click **Create**.
4. After your app is created, click **Keys and Tokens**.
5. Record your consumer API key and API secret, as you will need them in order to authenticate an instance of the Twitter connector.

Apps > **My Cool App v742**

App details   **Keys and tokens**   **Permissions**

Keys and tokens
