

Salesforce Sales Cloud - How can I ensure that the oauth flow redirects to my sandbox for Salesforce?

Last Modified on 05/06/2019 2:39 pm EDT

You can add a `siteAddress` parameter to the `GET /sfdc/oauth/url`. For example:

```
https://api.openconnectors.us2.ext.hana.ondemand.com/elements/api-v2
/elements/sfdc/oauth/url?apiKey=&apiSecret=&callbackUrl=https://console.clo
ud-elements.com/elements/jsp/home.jsp&siteAddress=https://test.salesforce.c
om>
```
