

Salesforce Sales Cloud - Custom Objects in Salesforce Sales Cloud

Last Modified on 05/06/2019 2:41 pm EDT

We support your custom objects and fields in the Salesforce Sales Cloud connector. Use the following endpoints:

- `GET /objects` to return all custom objects.
 - `GET /{objectName}` to interact with the custom APIs.
 - `GET /objects/{objectName}/metadata` endpoint to expose metadata for fields associated with your custom object.
-
