

PostgreSQL API Provider Setup

Last Modified on 01/15/2019 1:10 pm EST

API Provider Setup

You can create a connection to a PostgreSQL Database directly via an IP Address and Port Number, e.g. `123.123.1.123:3306`

Connecting Directly via IP Address and Port Number

This method would require a port be exposed so a connection can be made with SAP Cloud Platform Open Connectors. When creating an instance, the user would input the IP Address and Port Number exposed publicly.
