Release Notes - Version 2.200

Release notes -- develop (since 2.199)

Highlights

EL-407 FreshBooksClassic: Removed unwanted fields

- Removed extra fields in response model for `GET-/customers/{id}

EL-772 Magento: Model defect fix

- Fixed model defect for `PUT /orders/{id}`

EL-579 Slack: Fixed failing `me` and `groups` APIs

- `GET /me` and `GET /groups` APIs are working.

EL-675 Object metadata version 2.0

- Created new API `/objects/{objectName}/metadata` for `Helium` version i.e version `2`
- This version metadata depends on the connector models and advanced model properties to be returned as part of metadata
- Supports custom fields and custom objects

EL-479 Zoho CRMV2 : Fixed Model defects

- Added missing property 'First_Name' in `GET - /contacts/{id}` model

EL-759 : Stripe - Returns 400 status code for invalid

JSON for /charges/{id}/capture POST

- Now, for API `POST /charges/{id}/capture` for stripe on passing invalid json like "{", it returns status code as 200 with appropriate error message.
