

QuickBooks Online - Why do I see "This app is not set up to allow connection from your country" when creating an instance

Last Modified on 03/21/2019 2:44 pm EDT

This error is seen when you attempt to create an instance from a country that is not enabled on the QuickBooks Online app. QuickBooks Online allows you to choose several countries for each app. Add the country where you are attempting to connect from as explained in [QuickBooks Online Documentation](#).
