

Microsoft Dynamics Great Plains API Provider Setup

Last Modified on 03/19/2020 6:59 pm EDT

Microsoft Dynamics Great Plains has some initial setup that must be configured prior to creating a connector instance. Review the [Dynamics Great Plains setup instructions](#) prior to completing the steps listed below.

Follow these steps to set up a Dynamics Great Plains application with the endpoint:

1. Via a web browser, log in to your Dynamics Great Plains account.
2. Verify that the Legacy Endpoint is enabled.
3. SAP Cloud Platform Open Connectors will use NTLM Authentication to provision a connector instance.
4. Disable the firewall rules to allow our app servers to connect.

Please contact Customer Success for the IP addresses to our app server.
