

Production Release Notes - Version v2.208.78.2

Last Modified on 03/04/2019 1:11 pm EST

Release notes -- v2.208.78.2 (since v2.208.45)

Highlights

EL-1223 Pardot - Issue fix in object metadata

- Fix in generating metadata for objects endpoint in Pardot connector.

EL-878 & EL-900 amp; EL-981 | Added ability to retry hooks in Connector Builder and fixed trace issues

- Added `POST /hooks-tryitout` endpoint to enable re-trying hooks out through Connector Builder, see demo [here](#) !

RVCL-744 Common resources accounts and org fields with same path

- Throws 404 if transformations are null
- Allows account and org to level fields to have same path

EI 1296 cleo infusionsoftRest enhancements

- `Contacts Resource` - modified `GET/POST/PATCH/GETbyId` request and response models to follow standard model definitions
- `Orders Resource` - Added `POST/DELETE` method and modified `GET` response model to follow standard model definitions

- `Products Resource` - Added `POST/DELETE` methods
- `Transactions Resource` - modified `GET/GETbyId` request and response models to follow standard model definitions

RVCL-690: Don't store sensitive headers in FISEVs

- Do not store the `Authorization` header in formula step execution values.

EL-1522 | Expensify - Fixed swagger validation errors

- Updated modes for policies resources.

EL-1120 Intacct - Added resource for order-entry-transactions

- Introduced resources for `/order-entry-transactions` in Intacct connector.
- Enhanced models for Intacct connector.

RVCL-765: Map full arrays correctly when they are nested

- Fix for mapping full arrays using transformations when they are nested inside another object.

EL-1075 - Performance issue with file upload for the Evernote connector

- The Evernote connector's file upload was very slow, in the 50s range, for a not so large file, e.g., 700K.
- The issue appeared to be related to slow performance of a dependent, third party library.
- Upgrading this library to its latest released version fixed the issue.

EL-251: Allbound prehook JS made valid for v4 Endpoints

- Changed prehook JS to make it valid for v4 Endpoints

EL-1009 SAP C4C CRM Added Ping API

- Added new API:
 - `GET /ping`

EL-30 Google Analytics Added measurements API

- Added POST /measurements API

EL-49 : Facebook Social - Remove deprecated scope

- Facebook has deprecated `publish_actions` scope, so removing the same from our connector as well.
- Existing instances will continue working fine.
- New instances will not have the `publish_actions` scope configured in them.

EL-893 : Intacct - Added new APIs for resource to support DTD v3.0

Now following resources are added to support objects for DTD v3.0 for Intacct.

- `CRUDS /contacts-advanced`
- `CRUDS /ledger-accounts-advanced`
- `CRUDS /customers-advanced`
- `RDS /invoices-advanced`
- `RDS /credit-memos-advanced`

EL-1147 | GlobalMeet : Added support for native filter in reports API

- GET /reports/{eventId} API now supports where clause for filtering reports.

EL-162 SuccessFactors: Added 'where' parameter GET Onboardings API

- Added `where` parameter for `GET /getOnboardings` API

EL-1069 Successfactors requisitions model modified Age and TimeToFill from Integer to string

- Successfactors modified `GET /requisitions` response model to include "age" and "timeToFill" as "string" type

EL_15 SuccessFactors Performance Feedback

Added APIs to support performance feedback. Resources added

- achievements
- activities
- continuous-feedback
- continuous-feedback-request
- goal-templates
- goals
- permissions
- user-accounts/{id}/permissions
- goal-achievements
- dev-goal-achievements

RVCL-598 V2 backwards compatibility

- Makes v2 CO act like v1 with /accounts/{id}/objects/definitions and /instances/{id}/objects/definition

EL-12 sage200

- SAGE 200 connector

EL-1124 Etsy : Cleo Gap Enhancements

- Added the following resources :-
 1. GET /users
 2. PATCH /orders/{id}
 3. GET /billcharge/{id}
- Changed the models of the existing resources to standard models.

EL-1151 syncplicity : Added new resources

- Added following resources to Syncplicity connector:
 - company
 - companies
 - devices
 - groups
 - policies
 - users

EL-1326 - SFDC - Support filter by nested date queries like Account.CreatedDate

- FIX - SFDC - filter by nested date queries like `Account.CreatedDate` have issues

RVCL-596 Added the ability to search bulk logs by text

- Added `searchText` to `/usage/bulk` API
 - `searchText` works the same as in the `/usage` endpoint
-
