

Sage 200 API Provider Setup

Last Modified on 02/24/2021 12:00 pm EST

You must complete these steps in this article before you can authenticate an instance of the Sage 200 connector:

Find Developer Signing and Subscription Keys

Follow these steps to acquire your developer subscription keys:

1. [Register](#) with or [sign in](#) to the Sage developer portal.
2. From the [home page](#) of the Sage Developer Portal, click UK and then click the Sage 200 API you want to subscribe to.
3. Follow the steps in Sage to subscribe to a Sage 200 API.
4. After subscribing to the API, navigate to your [developer profile page](#) and complete these steps:
 - Under Your Signing Keys, click Get Keys and then click Show. Record the Primary signing key.

Profile

Email duane@cloud-elements.com
First name Duane
Last name Tharp

Change password

Change account information

Your Signing Keys

Digital Signing Keys [Get Keys](#)

Analytics reports

- Under **Your subscriptions**, click Show under the Primary Key. Record the key.

Your subscriptions

Subscription details	Product	State	Action
Subscription name Sage 200 Unlimited Rename Started on 02/02/2016 Primary key XXXXXXXXXXXXXXXXXXXXXXXXXXXX Show Regenerate Secondary key XXXXXXXXXXXXXXXXXXXXXXXXXXXX Show Regenerate	Sage 200 Unlimited	Active	Cancel

Registering your Application with Sage 200

For additional information about Sage 200 setup, including how to register your application and receive your API secret and key, see their [developer documentation](#).
