

Oracle HCM Cloud API Provider Setup

Last Modified on 12/30/2019 9:08 pm EST

To authenticate an Oracle HCM Cloud connector instance with SAP Cloud Platform Open Connectors, you must use the **Username** and **Password** that you use to log in to Oracle.

You also must enter the zone variation of the base URL used to access Oracle as the **Server URL**. For example, if you access Oracle at a URL like

`https://adc3-zdff-fa-ext.oraclecloud.com/main.html#!/main`, then the **Server URL** is `https://adc3-zdff-fa-ext.oraclecloud.com`.
