

# Staging Release Notes - Version v2.208.841

Last Modified on 04/08/2020 12:14 am EDT

Release notes -- v2.208.841 (since v2.208.834)

## Highlights

TS-1016 updated getting the formula to only use the userId when necessary

EL-3501 | Sage Intacct : No nextPage field for GET entities

- Adding next page to entities endpoint

EL-3502 - Sage Intacct : Where clause description should be changed

- Modified where clause description for /departments resource.

EL-3620 added /reversal and /void for bill payments

added: `/bill-payments/{id}/reverse` `/bill-payments/{id}/void`

EL-3224 SFDC Breaks Formulas

- Fix - SFDC - Formulas issues by updating config value of event.objects

EL-3734 Magento V2.0 Api calls are not working for Instance create using Custom Authentication Type

- Fix - Magento V2.0 - Custom Instances are not working as expected
-
