Staging Release Notes - Version v2.208.441

Last Modified on 03/13/2020 6:01 pm EDT

Release notes -- v2.208.441 (since v2.208.412)

Highlights

RVCL-936: Fixed account filter with bulk logs

- Fixes searching by account for bulk logs

EL-2319: Fixed models and end point names for pipedrive

- Added descriptive models for Pipedrive connector.
- Added a new resource to create new Notes.

EL-1774 : Resolved Bullhorn MetaData issue

- Resolved Metadata issue where VendorDisplay name is not being displayed in CE Response for vendor fields that have label field.

EL-1723: Swagger validation fails for nimsoft

- Swagger validation fails for Nimsoft

EL-2238: Enhancing Hubspot CRM api to return max payload when specified query param `all: true`

- Users can use query param `all` to receive the complete payload while invoking POST contacts or leads

EL-2009: Added polling capability to Workday

- For Workday:

- Added Event Polling Setup
- Added User Credentials validation during Instance provision

RVCL-1065: Ability to configure a CO mapping/transformation with no vendor object

- Added the ability to configure a CO mapping/transformation with no vendor object
- This enhancement will allow utilizing the mapping Javascript to be the main mechanism to retrieve/post data to an endpoint
- This enhancement can be leveraged by adding the following configuration to the CO transformation's `configuration` array

```
{    "level": "lt;organization|account|instancegt;",    "type": "unmappedV
endorObject"}
```

EL-2412: Intacct. not supporting '&' character for /vendors endpoint

- Fix - Intacct

GET QUERY POST PATCH APIS not works by including &

EL-2413: Evernote - /folder/contents API Makes Unnessary Calls for ROOT

- FIX - Evernote - `/folder/contents API` - makes unnecessary calls

EL-1459: Great Plains - Remove GET /{objectName} for TaxCode and paymentmethod from Apidocs and Get/objects

- Removed payment method and tax code from api docs and get objects.

EL-2048: GlobalMeet Webinar : GET/ events response body formatted

- GlobalMeet Webinar : GET/ events response body should be formatted.

EL-2453: Great Plains - querying the 'modifiedDate' for

GET /vendor uses incorrect field values

- Fixed Querying vendor by modified date does not work as expected.

EL-990: Hide webhook event in Google Drive connector configuration

EL-2405: Netsuite - PATCH/vendor Does Not Return Error When Incomplete Payload Is Used

- updating custom field list with internal ID does not work as script ID is passed as internal ID.

EL-2491: Docusign - Enhance Docusign To Derive The User's Language And Pass It As a Parameter to /documents/certificate

- Added a new parameter language which is passed to the endpoint. This enables the end point to support internationalisation for the documents certificates.

EL-2516: Sendgrid Add Attachment ability for /messages API

- Sendgrid - Customer can add multiple attachments with existing `Sendgrid` connector for `/messages` `API`

EL-2450: Deactivated Sugar connector

- Deactivated Sugar connector

EL-2488: OneDrive - Cannot Upload Files Over 5MB Using a Graph App

- Fix - OneDrive - Cannot Upload Files Over 5MB Using a Graph App by using `upload session` `API`
- For Instance's provision through Converged Apps make sure add `chunkedUpload=true` Query Param to upload large file with `upload session` `API`

IBM-129: Freshbooks: Removed extra space in "date_from " field in payments object

- Removed extra space from "date_from " field in payments objects.

IBM-131: Concur: Model fix for items object

- Removed trailing spaces from "ParentID " field from `items` object

IBM-132: Paypal : Model fix for orders and payments objects

- Removed trailing spaces from "experience*profile*id " field from payments and orders objects

EL-2406: Hide Onedrive v1 connector

- Hide Onedrive version 1 connector

EL-2579: OneDrivev2 and Egnyte- can't download files larger than 8 MB

- Fix - Onedrive and Egnyte Can't download files larger than 8MB
- Fix - HttpClient Url Encoding Issues
