

# Staging Release Notes - Version v2.208.218

Last Modified on 03/13/2020 6:08 pm EDT

## Release notes -- v2.208.218 (since v2.208.205)

### Highlights

#### EL-861 | Fixed issue with AutoTask mismatched

`emailAddress` prop

- Now the `/contacts` API will return `emailAddress` and `eMailAddress`. Both holds the same value
- Since, the existing `emailAddress` is not aligned with AutoTask metadata.

#### EL-1634 Ability to get Connector Swagger docs by objectName or by operationId

- Added new APIs to retrieve swagger docs by objectName
- Added new APIs to retrieve swagger docs by operationId

```
GET /elements/{id}/objects/{objectName}/docs
```

```
GET /elements/{id}/operations
```

```
GET
```

```
/elements/{id}/operations/{operationId}/docs
```

#### EL-1673 - Tangocard - Normalize response to return list for /catalogs API

- Tangocard - Fix /catalogs API not returning list in response by adding Response Root Key
- Added pagination ability to /catalogs API

#### EL-1432: Hide page parameter for APIs from Swagger Generation

- Hide the Page parameter from APIs from the swagger UI API-docs page

## EL-1705 Fixes Bill Charge Endpoint in Etsy

- Resolved Bug for Bill Charge Endpoint in Etsy connector.

## EL-1293 Created new resource in Evernote connector to delete notebooks

- New Resource for EverNote, /delete on top of ever note notebooks. This will perform and expunge i.e, permanent delete on top of the notebook.

## EL-1992 | Enhanced bulk download by considering select fields

- Now user can use bulk query `select fields` to pass in the required field names to retrieve over a bulk job.
- Helps the Hubspot users with many properties for an object by limiting the number of fields to retrieve through `select fields` in the bulk query. Since HubSpot doesn't encourage to pass in all the fields at a time.

## EL-2041 Adobe - Modified the vendor path

- Added support for pagination to `Agreements` , `Users` , `Groups` and `Widgets` resources
-
