

Google Drive - Only Native Google Files Can Be Stored In Binary Format

Last Modified on 09/12/2019 10:05 am EDT

Native google files can be downloaded directly with the help of the web content URL provided for them. However, for non native files, the URL provided by Google **does not** work.

Therefore, only native google files can be stored in binary format. Given below is the link provided by Google to download them:

<https://developers.google.com/resources/api-libraries/documentation/drive/v3/java/latest/>
