

Production Release Notes - Version vRVCL1062

Last Modified on 03/26/2020 3:59 am EDT

Release notes -- vRVCL1062 (since v2.208.307)

Highlights

EL-1145 Adds QueryParam to prune linked transaction of GET/payments of QBE

- Adds QueryParameter `fields` to fetch only required fields to reduce the computation time.
- Now we need to pass comma separated fields to fetch in response .

`ex: field1, fields2`

RVCL-916 Nulls in COs stay as null

- Null values will no longer be converted to `"null"` in COs when returning nulls are allowed

RVCL-856: All common resource fields should be included metadata fields

- All common resource fields should be included in the metadata fields from GET `/objects/{objectName}/metadata` for common resource objects including free text fields that do not match a field in the vendor metadata.

EL-1292:SFDC Bulk Query fetch all fields of nested custom Objects Optionally

- When executing bulk query API for Salesforce, based upon a flag `expandChildObjects`,

the response will contain all the fields of the nested objects present in the current custom object.

- When making bulk API query call, we need to pass {"expandChildObjects":"true"} in the metadata body in order to get the expanded view of the custom objects. This is an optional field.

EL-2039 - OneDrive - /files/metadata and /folders/metadata return 400 when using Converged apps

- Fixed OneDrive returning 400 using Converged app cred's for `/files/metadata` and `folders/metadata`

EL-2085 Implement Eloqua Custom Object Cache Refresh and Delete and Update Apis

- Refresh Of Custom Object Map after a new Custom Object is Created
- Implementation of Delete and Put on Custom Object Instance Data

EL-1755 Hubspot - Fixed the webhook NPE and instance configuration issue

- Fixed NPE in Hubspot CRM and Hubspot Marketing Webhook

EL-2164 Sage 200:PATCH /warehouses/{id} is creating new record.

- Sage 200:PATCH /warehouses/{id} is creating new record.

EL-2141 Implement OCNQL Queries for /expenses endpoint

- Concur Implement OCNQL Queries for /expenses endpoint

EL-2013: Pardot Connector :Adding email-statistics endpoint

- Adding list email statistics end point to Pardot connector (/emails/{listEmailId}/statistics)

EL-2006 SAGE Accounting (One) - POST Journal-Entry Models/Swagger

- SAGE Accounting (One) - POST Journal-Entry Models/Swagger.

EL-2068: Fixed Weebly's models and resolved model name duplicates

- Added a detailed model for Weebly's product resources.

EL-1767 - Eloqua - Retrieving Bulk CSV has extensive platform process time

- Fix - Eloqua Bulk Issue - Takes more processing time with new v2 bulk version

EL-1864 Plaid connector does not have bank name in access_token type au...

- Plaid connector does not have bank name in access_token type authentication.

EL-2201 Downloaded files from Amazon s3 are getting corrupted

- Downloaded files from Amazon s3 are getting corrupted
-
