

# Production Release Notes - Version v2.208.405

Last Modified on 03/13/2020 6:42 pm EDT

Release notes -- v2.208.405 (since  
vPR1134)

## Highlights

EL-366: Updating bullhorn job-submissions and opportunities APIs to support /query endpoint

- Now, users can use UNIX timestamps when filtering records with date fields.

EL-2163: Sage 200:DELETE /warehouse-holdings/{id} & DELETE /warehouses...

- Sage 200:DELETE /warehouse-holdings/{id} & DELETE /warehouses/{id} is not deleting record from the list

EL-2155: Checks if property is an association then use deals association property value

- fixes empty results when mapping to any associations field with

Removed Unmapped  
Fields

enabled in HubSpot Deals COs

EL-2199: adds authentication failed catch exception for /me and /ping

- With an invalid access token, a status code 401 and unauthorized message returns when calling GET /ping or GET /me in Dropbox.

## EL-2226: Added auth handling catch to /ping endpoint

- With an invalid access token, a status code 401 and unauthorized message returns when calling GET /ping in Box.

## EL-2230: Added auth failure catch in /ping

- With an invalid access token, a status code 401 and unauthorized message returns when calling GET /ping in Google Drive.

## EL-2149: Fixed metadata issue in Eloqua

- Enhanced the metadata of custom objects for Eloqua object.
- Fixed the Resource not found issue while getting the metadata of the custom object with no fields.

## EL-2129 Eloqua enabled PUT /forms to apidocs

- Adds `PUT forms` to Apidocs - `eloqua`

## EL-2214: SFDC Empty to Null transformation over bulk download in JSON format

- Enhanced SFDC to have a new configuration `bulk.nullify.empty` .
- This flag (`bulk.nullify.empty`) will be responsible to convert an empty value ("") to `null` over bulk downloads. Provided `filter.null.values` as `false` .

## EL-1827: Hide Abby connector

- Hide Abby connector from UI

## IBM-127: Twitter Advanced models amp; Content-disposition header issue

- Advanced models for Twitter connector
- Removed the 'Content-disposition' response header by adding a global Posthook

## EL-1616: FieldService Edge added validation during provisioning and fixed Swagger validation

- FieldService Edge added validation during provisioning and fixed Swagger validation

- SAGE Accounting (One) - POST Journal-Entry Models/Swagger changed

## EL-2224: Boxv2 - PUT /custom-fields-enterprise-templates/{templateKey} Not working

- Fix - Boxv2 PUT /custom-fields-enterprise-templates/{templateKey} not works as expected

## EL-2237: Enhanced Netsuite Bulk to suppress nested data on demand

- New option in the where clause `fetchAll='false'` will revert to mimicing a `/objectName` api
- Use this for Deep nested objects such as invoices, sales orders, etc. Could help as well where there are tons of custom fields.

## EL-2005: SuccessFactors' Host Name tooltip displays an href connector

- Removed the HTML Content and updated the working URL <https://help.sap.com/viewer/28bc3c8e3f214ab487ec51b1b8709adc/1811/en-US/03e1fc3791684367a6a76a614a2916de.html>

## EL-2381: Smart Recruiters bulk retries on permissions failure

- FIX - Smart Recruiters - Bulk Retries on permission failure

## EL-2250: Added a new config to Connectwise

- As per Connectwise latest updates to their REST API, we have added a new configuration parameter. i.e., `connectwise.clientid`. Which will be an optional instance config for now as it is optional for the Connectwise API as well.

## EL-2057: Exposing Concur baseUrl an some other properties

- Now users can customize the `baseUrl` for Concur, as per their sandbox.

## EL-2326: Changed Base CRM information and logo to zendesksell

- Base CRM changed to Zendesk Sell

## EL-1323: HubSpot Marketing: GET/contacts/{id} method has missing fields in 'ContactProperties' Model

- ContactProperties model is missing the following fields, *hspredictivescoringtier*, *hsallowneids*, *hsallteamids*, *hsallcontactvids*, *hsallaccessibleteamids* added them
