

Production Release Notes - Version vhotfix-EL-5310

Last Modified on 03/13/2020 6:43 pm EDT

Release notes -- vhotfix-EL-5310 (since vhotfix-EL-5156-2)

Highlights

EL-4291 | DropboxBusiness Webhooks issues

- Helps to process `member_info_change` events from Dropbox.
- Also fixes recent issues with DB duplicate events by a `debounce` approach. Means, when a new member gets added to the account, DB won't guarantee the cursor state and suggested to hold for few seconds to retrieve the latest cursor for such a member.

EL-3505 | Enhance Element Metadata Properties

- Added ability to expose additional properties through element metadata
- Added following columns to `element_metadata`
 - `vendor_supporturl`
 - `vendor_latestversion`
 - `oauth_tokenvalidity`
 - `event_types`
 - `polling_resources`
 - `webhooks_resources`
 - `vendor_supportwebhooks`
 - `cesupportnativebulk_download`
 - `cesupportnativebulk_upload`
 - `vendor_supportnativebulk_upload`
 - `vendor_supportnativebulk_download`
 - `object_discovery_support`
 - `support_customfields_discovery`
 - `vendor_support_customfields_discovery`
 - `apiratelimit`

EL-4415 - UnHide Snowflake element

DADA-137 upgrade to dataops-model 0.4.0

EL-4874 | Migration of Microsoft Dynamics GP('greatplains') to EB element

- Migrating GreatPlains to EB format

EL-4768 | Migration of Shopify to EB element

- Migrate Shopify to EB format

EL-4580 | EB-555 | Element Builder - Added ability to decide needs to decode the Encode Characters or not

- Fix - Element Builder - Importing Swagger With Encoded Characters Are Decoded

EL-4882 | Migration of Sage Accounting('sageone') to EB element

- Migrating Sageone to EB format

EL-4767 | Migration of Netsuitefinancev2 to Element Builder Format

- Migrate netsuite finance

EL-4934 | Salesforce - Added the Possibility to GET and PATCH Entities by External ID

- Added the possibility to perform /GET and /PATCH operations on `entities` by providing `external id`.
- Added the GET `/objectName/fields/{name}/{externalID}` Endpoint.
- Added the PATCH `/objectName/fields/{name}/{externalID}` Endpoint.

EL-4370 | Syncplicity - GET/folders/{id}/participants Not able to get participants for sub-folders

- Fix - Syncplicity - /folders/{id}/participants not works for sub-folders

EL-2867 | Migration of Hubspot to EB element

- Migrate Hubspot to EB format

EL-4876 Migration of QuickBooks Online to EB element

EL-5037 | Fix unnecessary 500's from SOBA.

EL-4232 | Brighttalk - few properties are missing in response

- Fix - Brighttalk - user.stateAbbreviation, user.countryISOCode, user.hubspotCountryValue fields not missing in the vendor response.

EL-5058 | Enhances AWS S3 element to support default or on demand Server Side Encryption

- Amazon S3 element enhancements.
 - Supports Server Side Encryption (SSE) for `SSE-S3`, `SSE-KMS` and `SSE-C`
 - Introducing a new endpoint `/encryption` with PUT, GET and DELETE.
1. `PUT /encryption:` Upserts the default encryption strategy and can be updated between `AES256` and `aws:kms`
 2. `GET /encryption:` Retrieves the current default encryption strategy configured.
 3. `DELETE /encryption:` Removes the default encryption strategy.
- On the other hand, users who don't want to configure default encryption strategy or want to use AWS offered SSE-C can use the request header newly configured for `/files` and `/folders` endpoint to encrypt their data at rest.
 - To understand how the headers work
 1. <https://docs.aws.amazon.com/AmazonS3/latest/dev/UsingServerSideEncryption.html>
 2. <https://docs.aws.amazon.com/AmazonS3/latest/dev/UsingKMSEncryption.html>
 3. <https://docs.aws.amazon.com/AmazonS3/latest/dev/ServerSideEncryptionCustomerKeys.html>

EL-4804: Added createDateUTC and updatedDateUTC to SAP B1

- Added createDateUTC and updatedDateUTC to SAP B1 [BETA]

EL-5117 | fixing unit tests

DA-176 fix avro bug in metricfactory

EL-5122 Snowflake | Bulk upload is uploading Header files to the Snowflake table

- Resolved header names appending to data in snowflake
-
