Production Release Notes - Version vhotfix-SDR-2944

Last Modified on 03/13/2020 6:43 pm EDT

Release notes -- vhotfix-SDR-2944 (since v2.208.1289)

Highlights

SLYT-1762 Enables zip and gzip compression for streams

- Enables zip/gzip compression of streams when requests contain Accept-Encoding header with values as "zip" OR "gzip" for files, bulk, and documents hub. **Compression for jsonl format for bulk is not supported for now.

TS-1429 Merge hotfix to feature branch - Connector Sharing

EL-6536: Google Analytics Make Account Name optional in instance provisioning

- Use Account Name boolean field is added as connector configuration
- By default it is set to true, if true, valid account name is required
- If Use Account Name is set to false, instance can be provisioned without providing account name

EL-6653 : IntacctV3 Connector Addition of folders and files legacy resources

- Addition of folders-legacy and foldes-legacy/{folderName}/files resources
