

Production Release

Notes - Version

v2.208.1126

Last Modified on 03/13/2020 6:43 pm EDT

Release notes -- v2.208.1126 (since v2.208.1116)

Highlights

EL-4984 | CO - associations not showing up in the raw response in case there are no fields mapped to associatedObjects

- The associations will show up in the raw response even if mappings to associated objects do not exist in the CO.

EL-5454:Export Extended Resources to Community

- Backend API /publish enhanced to take care of publishing only extended resources of system connectors

EL-5002 | Quickbooks - Remove OAUTH1 from setup page

- We've removed OAuth1 option from provisioning page as Quickbooks is deprecating the OAuth1 authentication mechanism in preference to OAuth2.

EL-5447 | Salesforce Files - fixed overwrite parameter

- Fixed Salesforce Files to override existing file as a new version if `overwrite` parameter is provided
