

Facebook Lead Ads - Unable to Provision an Instance with Webhooks Enabled

Last Modified on 03/17/2021 11:44 am EDT

If you're running into issues when provisioning an instance of Facebook Leads Ads with webhooks, try these steps.

- Ensure that your Facebook app permissions include `manage_pages` and `leads_retrieval`.
- On provision, enter the app version that correlates with your Facebook app version.

**Facebook Lead Ads**

Name*
facebookleadads

Configuration

[HIDE OPTIONAL FIELDS](#)

Facebook Version
v4.0

OAuth API Key

OAuth API Secret

OAuth Scope
manage_pages,ads_management,pages_messaging,leads_retrieval

Callback Notification Signature Key

Filter null values from the response
true

Element Instance Tag

Add a new tag to the element instance

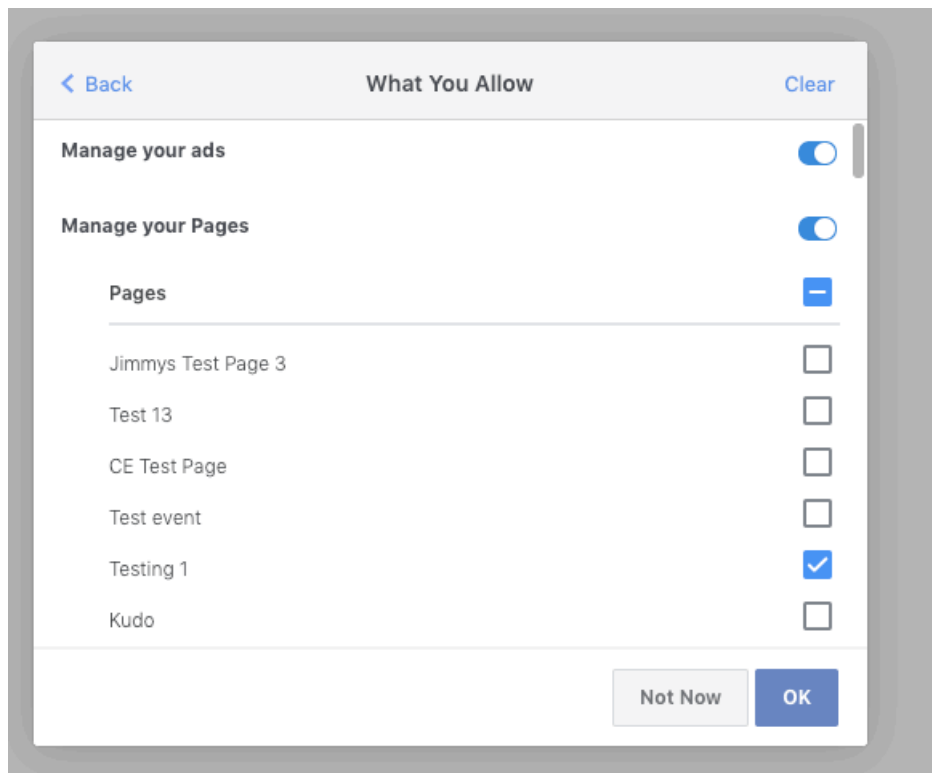

Event Configuration

Events Enabled

Event Type
webhook

[REVISIONS](#) [CANCEL](#) [CREATE INSTANCE](#)

- When going through the authentication flow for Facebook, make sure to only allow pages that you want to receive events from.

- Make sure you have admin access to those pages: https://www.facebook.com/help/187316341316631?helpref=uf_permalink
