

Salesforce Sales Cloud - Request Limits Exceeded

Last Modified on 03/16/2020 3:37 pm EDT

Salesforce has API request and concurrent request limits based on the type of Organization and the Salesforce Edition. After these requests limits have been exceeded, the following error is thrown: ConcurrentPerOrgLongTxn Limit exceeded, REQUEST_LIMIT_EXCEEDED with error code : 403. For most of the scenarios, SAP Cloud Platform Open Connectors displays Provider Message and Error Code as-is which is received from the Vendor.

For more information on the request limits and different error codes we can refer to the below links:
