

# Staging Release Notes - Version v2.208.1493

Last Modified on 01/05/2021 10:28 pm EST

## Release notes -- v2.208.1493 (since vhotfix-EL-7869)

### Highlights

#### EL-7697 | Enhance Connector Builder setup to make configurations extendable

- Ability to make the connector configurations extendable.

#### CU-838 | Formula Execution Steps and Step Values download APIs

- Two new APIs
  1. /formulas/instances/executions/:id/steps
  2. /formulas/instances/executions/:id/step-values
- These APIs helps to download the formula execution steps and step-values respectively as a stream/file.

#### EL-7663 Introduction of new privilege to control Connector Safelisting

- Introduction of new privilege `Manage Org SafeListing of Connectors`
- This permission is to allow user to update remove safelist connectors for the organization

#### EL-8005 | Generate column data for connector config `owner_account_id` when Developer runs ElementGeneratorGroovy

#### EL-7869 - Introduced Import/Export of COs

- Introduced Import/Export of COs (Supports Org and Account level)

#### DELIVERY-1865: Added content-length param for Sugar attachments

- Have added content-length parameter in documents/{id}/attachments endpoint of Sugar so that Sugar can respect any values passed in from the query parameters.
- Before changes: Even if we pass content-file-name as query param, the filename in the response wasn't changing <https://cl.ly/c05f7d557e6a>
- After changes: The filename in response changes as per the value sent in the content-file-name parameter <https://cl.ly/45bd587fb514>

#### EL-7873:Ultipro Connector /fields resource addition

- Added two new resources to Ultipro connector

- GET `/companies/{id}/fields` and `/companies/{id}/employees/{employeeId}/fields`

## EL-8079: BrightTALK - Upgrade BrightTALK Production URL

- Updated BrightTALK production url from 'https://api.brighttalk.com' to 'https://api2.brighttalk.com/'.

## EL-8098 | Custom Connectors fails to save if any cloned connector doesn't contain default configuration params

## EL-8116 | Mandatory extended connector configs cause instance creation failure
