

Staging Release Notes - Version v2.208.1609

Last Modified on 07/27/2020 2:09 pm EDT

Release notes -- v2.208.1609 (since vhotfix-SDR-3591)

Highlights

EL-8158 | Snyk: Upgrade HttpClient and other modules that bring older versions of HttpClient

Upgrading HttpClient Library

CU-1148 | feat(pubsub): adding key to consume from new topic for pubsub

EL-8573: Sage Accounting Upgrade connector to v3.1

- Upgraded the Sage accounting connector to v3.1
- Updated models with x-primarykey, x-searchables
- existing instances will work with version v3 api's

EL-8741 Enhanced Odata to include primary key for imported resources

- Enhanced Odata import to include primary key for imported resources

EI 7700 invoke jarvis sync from circleci

EL-8733 | fix(organization apis): Updating roles is taking too long for a specific organization

ENG-113 continue to troubleshoot

- adjustments to circleci job for apac0 (helm3)
- set the db upgrade job to just spin up a pod, will have to manually execute it for now

EL-8776 Configured new Resources

EL-8831 | feat: allowing users to specify api version for DryFly connector when creating instance

- Users can specify the API version while creating an instance in the following ways

1. By passing the `version` instance config
2. By prefixing the version number to the username followed by a space. For example `1 username`

3. If omitted, the default version will be used. i.e., 1
