

# Staging Release Notes - Version v2.208.1671

Last Modified on 09/24/2020 12:23 am EDT

## Release notes -- v2.208.1671 (since vhotfix-ENG-570)

### Highlights

ENG-146 | fix PATCH /formula when engine is null, debuglogging cannot be false

- PATCH V3 formula with "debugLoggingEnabled": "false" works for formulas with null engine type

ENG-309 jarvis: upsert and delete bulk api support with connector level details...

chore: set heap for cache usage to false

ENG-470 deal with quartz transactional annotation
