Production Release Notes - Version v2.208.1771

Last Modified on 02/01/2021 7:00 am EST

Release notes -- v2.208.1771 (since v2.208.1754)

Highlights

Databse dr revival

- revived the terraform databases for DR purposes in the older environments, since the `apac0` centric ones require infra-installer data that's not yet available in those environments
- updated prd0-aws-euw1 configs so they work

chore(servicetest): Enable ElementInstancesRbacOrganizationTestIT

- Reenables test cases for service tests

ENG-1068 | feat(elements) : New API GET:/events/:id for Chargebee connector

- New API GET:/events/{id} for Chargebee connector.

fix(notification): correct minor spelling issue (#13260)

ENG-767: SugarMarket - added new resources

- Added new resources for Sugar Market connector.

ENG-1461 | New API /incident-metrics for Zendesk with GET and GETById

- New API /incident-metrics for Zendesk with GET and GETById

ENG-1344 changed MDCHelper vendor_times to merge overlapping calls

ENG-767-fix: update the pagination version in connector table

- Updating Sugar Market connector to use the pagination V3.

Revert "feat: disable connector instance upon oauth refresh failure (EN…
