Staging Release Notes - Version v2.208.1803

Release notes -- v2.208.1803 (since v2.208.1794)

Highlights

ENG-1551 | Xerov2 new ONPROVISION resource

- Changes related to Xero V2 provisioning
- `xero.tenant.id` is not a mandatory parameter anymore.
- But at least one of `xero.tenant.id` or `xero.tenant.name` must be supplied.
- If `xero.tenant.name` provided, during the OAuth authorization flow, the element can pull the tenant id associated with the tenant name.

ENG-1256 : SAPB1 - Fixed issues with endpoints where clause

- Fixed issues with endpoints `where` clause for `/item-groups` amp; `/industries`

ENG-215 Added coupa cxml invoice post endpoint

- Added coupa cxml invoice post endpoint

ENG-1518: SAPB1 - Added POST, PATCH for purchase-requests

- Added documentation for POST and PATCH /purchase-requests of Sap Business One.

ENG-1519: SAPB1 - Adding patch purchaseRequests

- Enhanced Sap Business One to include PATCH /purchase-orders.
