Bulk FAQ

Bulk Job Status and Errors APIs

Use the `GET /bulk/{id}/status` API to check the status of a bulk job.

Bulk Job Statuses

Status	Description
CREATED	The bulk job has been created, but has not yet begun.
STARTED	The bulk job has been created and has begun.
RUNNING	The bulk job has begun and is currently working.
ABORTED	The bulk job did not successfully complete because of an issue on the SAP Open Connectors side.
ERROR	The bulk job did not successfully complete because of an issue on the vendor's side.
COMPLETED	The bulk job successfully completed.
CANCELLED	The bulk job was canceled by the user before it successfully completed.
CANCELLATION_PENDING	The bulk job has been canceled by the user and is in the process of cancelation.

Bulk Job Errors

This section lists and describes possible bulk job errors, as well as potential causes and solutions.

My job says completed but when I make a call to `GET /bulk/{id}/{objectName}`, I'm getting a `Bad Request` error message.

Make sure the `Response Content Type` you specified from the UI dropdown matches the format field of your POST bulk/download query.
