

How can I configure a custom IDP at the account level?

Last Modified on 08/26/2021 7:26 am EDT

You can configure your own custom IDP at the account level, which will override the default IDP setting; see the relevant [docs](#) and [this post](#) for additional information.

Note: If a custom IDP stays active even after a customer account is offboarded and re-onboarded to a subaccount, submit a support ticket to LOD-OCN-SRV requesting a manual deletion.
